

beyazay
zeytin-turşu

We combine traditional recipes with a high quality production process.

As a result of our understanding of quality, we take into account the dimensions of production, hygiene, human health and environment. We deliver our products to your table at high standards. Our standards in production processes are in line with the criteria determining the descriptions of sustainable and organic farming practices accepted by the whole world. We supply our vegetables, which are included in our products, from fields in elite regions of our country where renewable irrigation systems techniques are applied. Without interfering with the natural process in any way, we collect the vegetables that are sprayed with the minimum amount in season. We ferment it as soon as possible without losing its freshness. We can follow and control all the stages our products pass from the field to your table. we have ISO 22000-9001, HALAL, DOMESTIC PRODUCTS certificates. Our production facility constantly audits the standards required by these documents both independently and within its own structure. Our BEYAZAY brand pickles and olives, it is proud to present our superior quality standards to your table.
